

Fuze Mobile 5.3

These release notes provide information about Fuze Mobile for iOS® and Android™.

Note: Always remember to visit our [Fuze Community site](#) for the latest release notes and other information.

What's New?

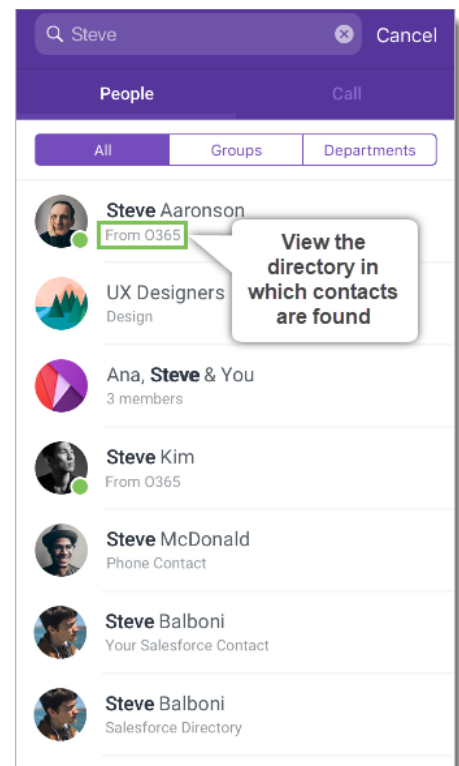

Look up all contacts in Connected Directories

In previous versions of Fuze Mobile, if you connect a Google and Office 365 account to Fuze, your personal (saved) contacts are automatically imported so that you can easily find and communicate with them directly from Fuze.

Beginning in this release, you can access your organization's full directory when you connect a Google or Office 365 (Active Directory or Azure Active Directory) account to Fuze.

When you search for someone in a connected account, Fuze can now perform an on-demand search of your corporate directory along with the rest of your contacts.

You can view details about the directory in which the contact is found directly in the search results.

A couple of notes about searching...

Because corporate directories can include a large number of people, Fuze automatically loads contacts as you scroll through search results. If for some reason results cannot be loaded from a connected account, a timeout message appears at the bottom of the search results list, and you can retry your search.

Timeout message:

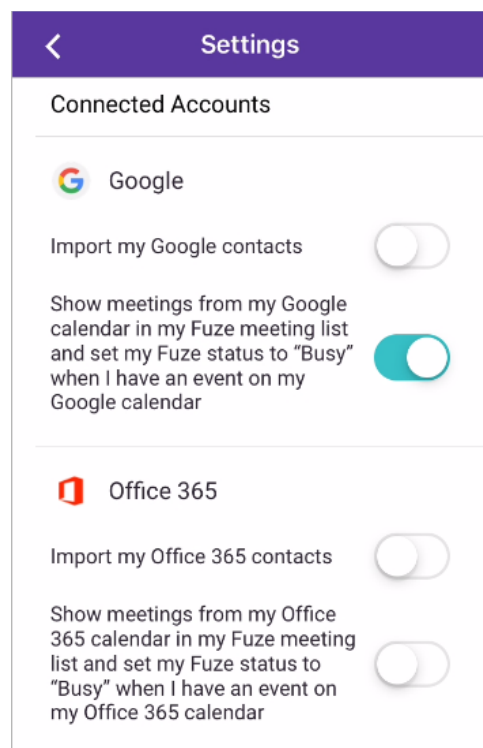

Resource contacts (like conference rooms), and contacts without a phone number are not included in search results retrieved from connected accounts.

How do I connect my Google or Office 365 account?

Connecting Fuze to your Google or Office 365 account is easy! Just open the **Profile** menu and tap **Settings** to open the Settings screen.

Then, navigate to the **Connected Accounts** section, tap on the *Import my Google contacts* or *Import my Office 365 contacts* setting(s), as show below, and log in to Google or Office 365 when prompted.

Fixed Bugs and other improvements

As with every new release of Fuze Mobile, this version includes performance and stability enhancements.

System Requirements

iOS

Download: [App Store®](#)

Size: 103 MB

Operating System: iOS 10, iOS 11

Compatible Devices: Apple® iPhone® 5, 5s, SE, 6, 6 Plus, 6s, 6s Plus, 7, 7 Plus, 8, 8 Plus, X, XR, XS, XS Max
