

Fuze Desktop 4.8.1

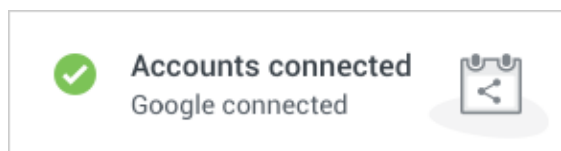

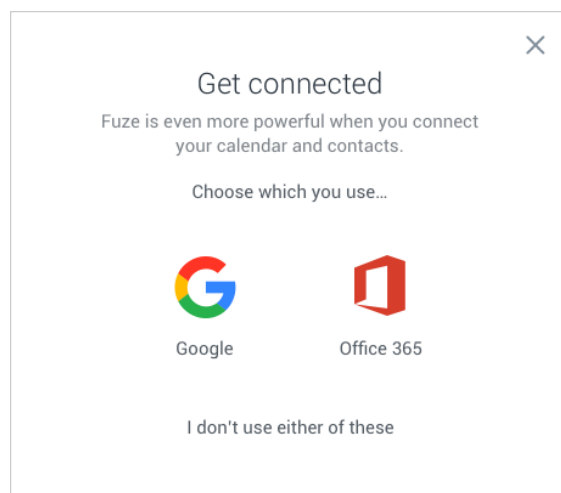

These release notes provide information about Fuze Desktop for Windows® and Fuze Desktop for Mac.

Note: Always remember to visit our [Fuze Community site](#) for the latest release notes and other information.

General Fuze Desktop

Onboarding Connected Accounts

For first time users, the Fuze Desktop initial configuration workflow now allows users to connect Fuze to their O365 or Google accounts.

Voice

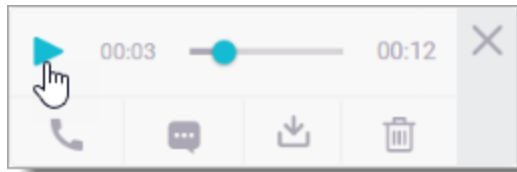

Voicemail improvements

This release introduces several improvements for managing voicemail, including:

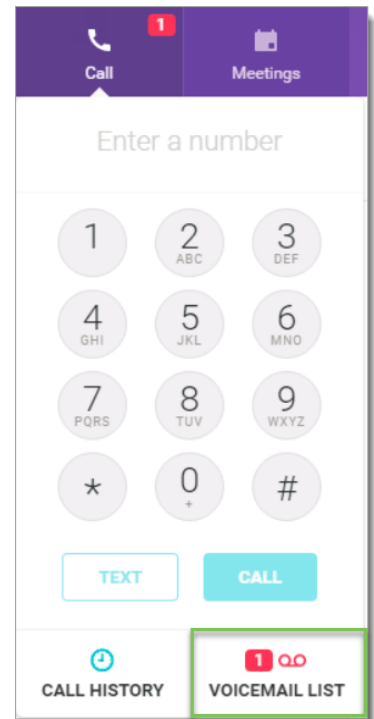

- Users can now delete voicemails from within Fuze Desktop, including unplayed voicemails.

- Playback controls are now available while listening to a voicemail message.

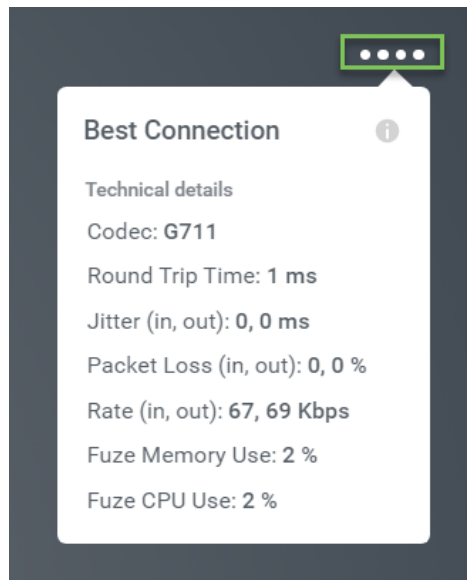

- Users can now download voicemail and specify the location in which the downloaded voicemail is saved.

In-call improvements

Call connection performance indicator

Beginning in this release, users can view an in-call connection performance indicator that includes a signal status icon , as well as detailed call quality information.

Additional improvements

This release includes additional call quality and stability improvements.

Headset support improvements

This release introduces continued improvements to support Jabra™ and Plantronics® headsets.

Note: Please make sure to follow our guidelines for headset compatibility. Additional information is available in the [Fuze Desktop Supported Headsets](#) article on Fuze Community.

Start Now meeting improvements

Start Now meeting behavior is modified in this release. Users can only invite attendees to a meeting if its a *Scheduled* meeting. Users can *Start Now* when no attendees are invited, and then share the meeting link with others.
