

Fuze Mobile 4.8

These release notes provide information about Fuze Mobile for iOS® and Android™.

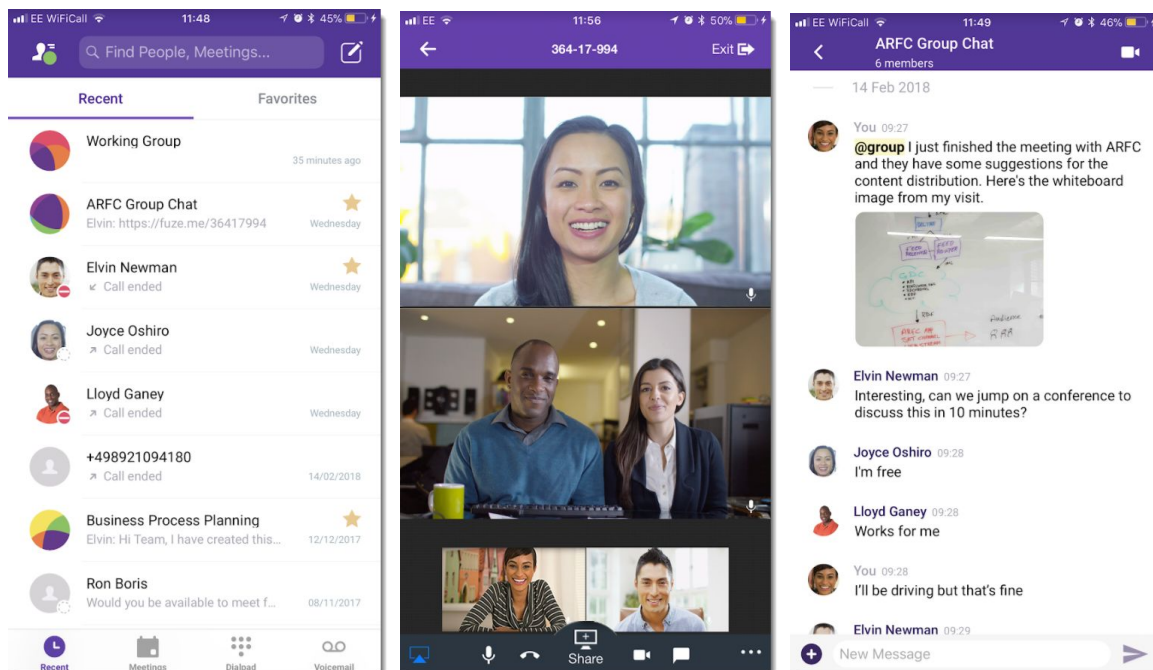

Note: Always remember to visit our [Fuze Community site](#) for the latest release notes and other information.

What's New?

Interface enhancements

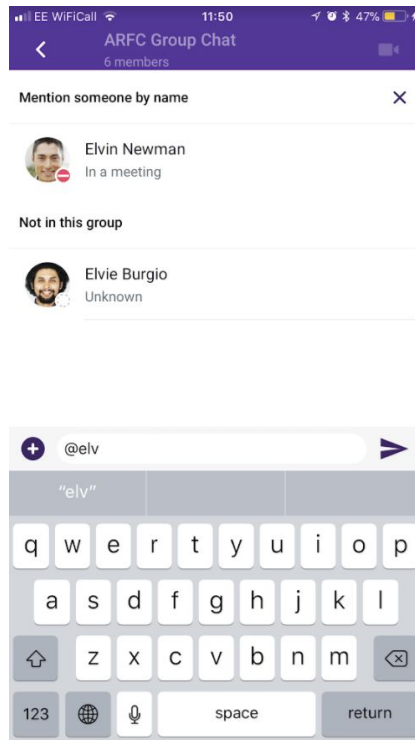

The Fuze Mobile interface is now more dynamic and modern.

Fuze Mobile now has a fresh coat of paint, an updated interface, and dozens of small design changes to enrich and make your experience more meaningful.

Mentions in Chat

You can now get the attention of contacts in your chat conversations by using mentions. To mention someone, enter an 'at' symbol in the text field, immediately followed by the name of the contact (e.g., "@Lily Johnson"), or select them from the list that appears. When you mention someone, Fuze alerts the person to your message.

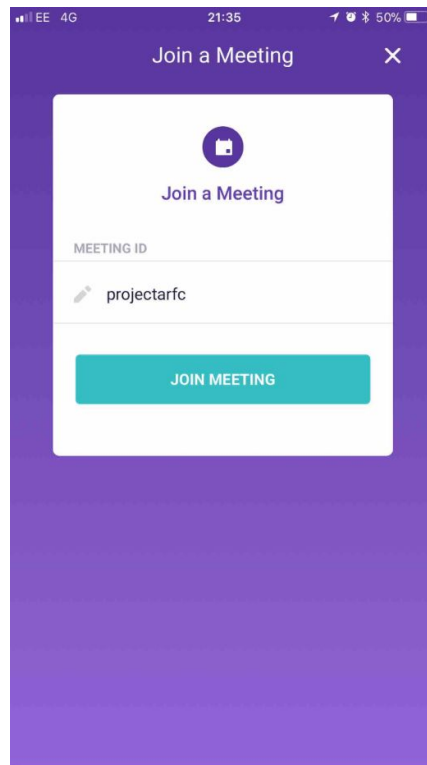

Vanity Meeting Links

You can now join meetings using a Vanity link or name in Fuze Mobile. A Vanity link is a custom hyperlink that you can use any time you want to start a meeting.

For example, if you are part of a group that holds impromptu meetings often, instead of starting a new meeting with a unique meeting ID each time, you can meet using a vanity link that includes your group name instead of an ID number (e.g., projectarfc, or <https://fuze.me/projectarfc>).

Any time you want to start an ad-hoc meeting using the vanity link, just tap **Meetings**, then **Join a Meeting**, then enter the vanity link or name, and tap **Join Meeting**.

Attenzione!

Fuze Mobile is available in Spanish, French and German, and now Italian too!

Simply set your Operating System language to Italian, and Fuze Mobile automatically switches to Italian as well.

Salesforce Integration Improvements

This release introduces improved integration with Salesforce:

- If you are on a call with a contact in Salesforce, a Salesforce icon now appears on the in-call screen. You can tap the Salesforce icon to view the person's contact card.
- From the contact card, simply tap the Salesforce Profile link beneath the person's name, or tap the Salesforce icon in the Opportunities section to open the contact or opportunity in the Salesforce1 app (if installed), or a mobile web Salesforce view.

Improved Meeting Reminders

You can now join meetings by simply tapping a meeting reminder notification on your lock screen. When you tap Join in a meeting reminder notification, Fuze Mobile now joins the meeting immediately after you unlock your phone.

Enhancements for Multi-Device Support

When you are signed into Fuze Mobile on two or more mobile devices at the same time, Fuze Mobile now lets you know by generating a notification. With a single tap, you can select which device receives your Fuze calls.

Ability to reply to voicemails via message

You can now easily reply to voicemails with a message. Simply tap the Message button within the voicemail playback area, and type your reply message to the person who left the voicemail.

Note: Messages to other Fuze users are sent via chat, and if SMS messaging is enabled for your Fuze account, you can also reply to voicemails from external contacts via SMS.

System Requirements

iOS

Download: [App Store®](#)

Size: 103 MB

Operating System: iOS 10, iOS 11
